

Comfort in Every Instrument

ErgoX[®]

ErgoDenta[™]

Exclusively distributed
by DPC Dental in the UK

From *Denmark* to dental clinics worldwide

ErgoDenta™

Based in Denmark, ErgoDenta develops dental instruments with a focus on ergonomic design, quality and everyday clinical needs. Our silicone-handled range ErgoX® gives dental professionals a choice of grips and working ends to suit the way they work.

Through our distribution partners, we bring that choice to dental clinics around the world.

“

As a dental practitioner and educator, I have used ErgoDenta instruments in clinical practice and selected hands-on training courses.

In my experience, their quality, precision, and ergonomic design have been helpful in both settings.

I have appreciated their consistency and generally found them reliable and suited to the tasks performed. They may be worth considering for professionals evaluating instruments for their clinical and educational needs.

Dr. Tinatin

Head of "Evergreen Dental Center By
Dr. Tinatin Topuridze", Dental therapist

ErgoSlip 2564G-X is a brilliant instrument for the toolkit of any dentist doing layered anterior composite restorations. I had long been searching for the right instrument for shaping the dentin layer and mamelons of anterior incisal edges, and for applying characterization composites. This instrument fits that purpose perfectly.

Petteri Viljakainen, HLL

Accredited Fellow of the American
Academy of Cosmetic Dentistry

Universal Currettes

Versatile scaling across multiple tooth surfaces with up to 3× longer-lasting sharpness.

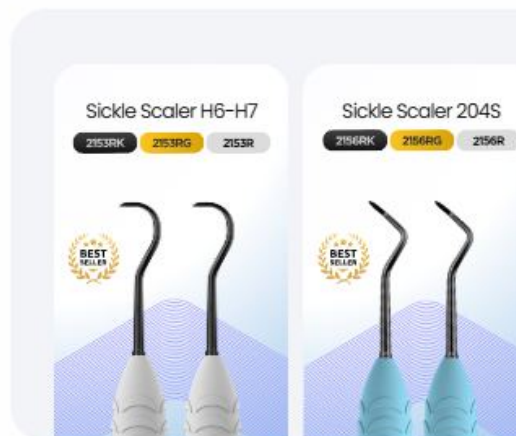

Mini Gracey Curettes

Slimmer working ends with up to 3× longer-lasting sharpness for easier access to deep and narrow pockets.

Sickle Scalers

Long-lasting sharp edges, up to 3× longer, for efficient removal of calculus with fewer interruptions for sharpening.

I have been using ErgoDenta's ErgoRazor instruments for some time and I am very satisfied with them. The instruments are high-quality and reasonably priced. I warmly recommend ErgoDenta.

Precision Vision for Endodontics

MICROSCOPIC MIRRORS

36-layer coated, anti-glare mirror for clear visibility in microscope-assisted procedures. Available in two thicknesses: ultra-thin 0.7mm for maximum access and visibility, and standard 1.5mm for added durability. Sold with the ErgoLite mirror handle.

Size	Regular	Ultra-thin
3mm	7091R	7091U 
5mm	7092R	7092U 
7mm	---	7095U
2x7mm	7093R	---
3x6mm (Oval)	---	7093U 
3x6mm (Water Drop)	---	7094U
3x9mm	7094R	---

"A clear image, an ergonomic handle that sits comfortably in the hand, a wide choice of shapes and sizes and the ultra-thin profile of the mirror heads (0.7 mm) make ErgoDenta mirrors extremely versatile and allow good orientation and handling in the operating field – whether in microsurgical endodontics or, say, when treating hard-to-reach caries. And on top of that, a very pleasant price. Thanks to it you can have several of them on the tray at once, and you don't have to be afraid to actually use them."
